Dear BIMR Evaluation Committee,

I am delighted to provide a letter of support for Mr. Cameron Gurwell, who is applying to the Future Materials Innovators competition together with his colleague from the Vargas-Hernandez group, both in Chemistry at McMaster University. Cameron is completing his final year of his undergraduate Honours Chemistry degree this spring and is starting his graduate studies with my group in May.

Their proposed BIMR collaborative project is entitled "Optimising conductivity via genetic algorithms using simulated doping for solid-state batteries". It builds on skills Cameron has developed through his course work with Dr. Vargas Hernandez in CHEM 4PB3 and his research project in my group.

The collaboration is new and I support Cameron (and Uriel) spending time on the exciting research project.

Best regards,

Gillian Goward.

Gillian Goward. Ph.D.
Professor of Chemistry
